POTATO SEED MAY BE SCARCE

SMALL POTATOES DISEASED
Now is the time to lay in a supply of seed potatoes for next season's use. Certified seed and other seed of good quality may be secured at this time. It is probable that good potato prices will stimulate production next year with the result that there may be a seed shortage the next spring. Many may then be led to plant inferior small potatoes called "single drops." Three typical hills dug from a field infested with mosaic this year produced a total of five potatoes, four of them big enough for single drops. The yield per acre on these hills was at the rate of 25 bushels, while an adjoining hill that was healthy had six marketable potatoes or a rate of nearly 500 bushels per acre. The planting of single drops coming from disease infested hills is certain to result in seriously reduced yields.—Farm crops department.

AN ABSTRACT IS A HISTORY OF LAND TITLE
An abstract of title is a short methodically written history of the title to a designated tract of land. It consists of a summary of the material parts of every recorded instrument of conveyance which affects the title, together with a statement of all liens and incumbrances to which the same is subject.

The object of an abstract is to afford the prospective purchaser or mortgagee of real estate a convenient means of ascertaining the condition of the title.
The cautious man will not accept a deed or a mortgage on real estate unless it is accompanied by an abstract prepared by a reliable firm.
